NOVELLO'S WORKS

ON THE THEORY OF MUSIC, &c.

	s.	d.		s.	d.
ALBRECHTSBERGER'S COLLECTED WRITINGS ON THOROUGH-BASS, HARMONY, AND COMPOSITION, FOR SELF-INSTRUCTION. Translated from the German by Sabilla Novello. The musical examples revised by Vincent Novello ..	8vo, cloth	10 6	JAHN, OTTO.—LIFE OF MOZART. Translated from the German by Pauline D. Townsend, with five Portraits, and Preface by Sir George Grove ..	3 vols., cloth	31 6
Or, separately:—			NIECKS, FREDERICK.—CHOPIN AS A MAN AND MUSICIAN, with a Portrait, etched by H. R. Robertson, and Fac-similes of the Composer's MS. ..	2 vols., cloth, gilt	25 0
Vol. I. Thorough-Bass and Harmony ..	8vo, paper	3 6	VOICE AND VOCAL ART; a Treatise written by Sabilla Novello for the use of Teachers and Students of Singing, with anatomical illustrations ..	8vo, paper	1 0
Vols. II. and III. Guide to Composition ..	each	3 6	SUCCINCT INSTRUCTIONS FOR THE GUIDANCE OF SINGING SCHOOLS AND CHORAL SOCIETIES. By F. Silcher. Translated from the German by Sabilla Novello.	8vo, paper	0 6
BERLIOZ.—A TREATISE ON MODERN INSTRUMENTATION AND ORCHESTRATION. Containing an exact table of the compass; a sketch of the mechanism, and study of the quality of tone and expressive character of various instruments; together with a large number of examples in score, from the productions of the greatest Masters, and from some unpublished works of the Author ..	8vo, cloth	12 0	THE ORGAN PRIMER. By J. Stainer. (Novello's Music Primers, No. 3.)..	Paper cover	2 0
CATEL'S TREATISE ON HARMONY. Translated from the French by Mary Cowden Clarke. Revised by J. Bennett ..	8vo, paper	2 6		Paper boards	2 6
CHERUBINI'S TREATISE ON COUNTERPOINT AND FUGUE. Translated from the French by Mary Cowden Clarke.	8vo, cloth	6 6	THE ORGAN. By Frederick Archer. A Theoretical and Practical Treatise intended to assist the Student in acquiring a sound knowledge of the instrument and its proper manipulation, with a series of Original Exercises and Illustrative Compositions written especially for this work.	Paper cover	6 0
DR. CROTCH'S ELEMENTS OF MUSICAL COMPOSITION, with the Musical Examples properly combined with the Text ..	8vo, paper	4 6	THE ART OF ORGAN PLAYING. By W. T. Best. Practically illustrated from the first rudiments to the highest difficulties of the instrument; both in its use as an accompaniment to the different styles of Church Music, as well as in the various purposes of the employment of the Organ as a Solo Instrument	Part 1	3 0
GENERAL MUSICAL INSTRUCTION. By Dr. Marx. An aid to teachers and learners in every branch of musical knowledge. Translated from the German by George Macirone.	8vo, cloth	6 6		Part 2	7 6
MOZART'S SUCCINCT THOROUGH-BASS SCHOOL. Translated from the German by Sabilla Novello ..	8vo, paper	0 10	RINK'S PRACTICAL ORGAN SCHOOL, carefully revised, with the German directions and terms translated into English, and the pedal parts printed on a separate staff. Edited by W. T. Best ..	Oblong folio, cloth	12 0
A DICTIONARY OF MUSICAL TERMS. By John Stainer, M.A., Mus. Doc., and W. A. Barrett, Mus. Bac. Cloth, gilt edges, imperial 8vo		7 6		6 books, each	2 6
A THEORY OF HARMONY. By John Stainer, M.A., Mus. Doc. With Questions and Exercises for the use of Students ..	Cloth, gilt edges	7 6	PRACTICAL ORGAN SCHOOL. By F. Schneider. New and abridged edition, containing Instructions for playing the Organ, with numerous Exercises for acquiring the use of the Pedals ..	Paper cover	2 6
SIR JOHN HAWKINS'S GENERAL HISTORY OF THE SCIENCE AND PRACTICE OF MUSIC.				Paper boards	3 0
In 2 vols., super royal 8vo, cloth ..		21 0	STUDIES FOR PEDAL-PLAYING. By F. Schneider. Forming Chapter III. of the Complete Organ School ..		3 0
Supplementary Vol. (Portraits) ..		16 0	INSTRUCTION BOOK FOR THE ORGAN. By Dr. Steggall. Consisting of plain directions for the use of the stops, and followed by Progressive Exercises for the Manuals and Pedals.	Oblong folio, paper	3 0
A TREATISE ON CHOIR AND CHORUS SINGING. By F. J. Fétis. Translated from the French by the Rev. T. Helmore, M.A.	8vo, paper	1 0	ELEMENTARY METHOD FOR THE ORGAN OR HARMONIUM. By S. Neukomm. Containing complete directions for the management of the stops on the Organ and the use of the Pedals, &c. ..	cloth	10 6
METHOD OF SINGING. By Julius Stockhausen. Translated into English by Sophie Löwe		5 0			
A MANUAL OF SINGING. By Richard Mann, for the use of Choir Trainers and Schoolmasters, with additions by J. Stainer ..	8vo, paper	1 0			
BACH, JOHANN SEBASTIAN.—HIS WORK AND INFLUENCE ON THE MUSIC OF GERMANY, 1685-1750. By Philipp Spitta; translated from the German by Clara Bell and J. A. Fuller-Maitland ..	3 vols.	42 0

PREFACE.

ENGLAND may well be proud of her numerous Choral Societies; they serve the triple purpose of encouraging composers, of making their members familiar with the literature of concerted vocal music, and of periodically giving the public pleasurable and instructive performances. But there is another side of the story; it is in many cases exceedingly difficult to keep them in a state of efficiency, or to get members to maintain their interest in them for any great length of time. Loss of efficiency is easily explained; in all such societies it constantly occurs that certain very efficient members insist on retiring, whilst certain very inefficient members equally insist on staying. It may be urged that inefficient singers should never have been elected members. Quite so; but it is not always possible to foresee that enthusiastic persons (perfectly devoted to music) are going to turn out dullards, and but few conductors are in the happy position of being able to find to hand a "ready made" society consisting entirely of efficient singers. Loss of continued interest may, I believe, be often explained in a manner which may also account for the frequent resignation of efficient members. Many good members of choral societies, although they fully recognise the benefit and satisfaction of learning great works, feel inwardly that they are doing more good to other people than they are to themselves. They think that the society is of no real value to them individually, and for this reason: *it may indeed make them better musicians, but it does not make them better singers.* This feeling is perhaps rarely, if ever, openly expressed, but every conductor knows perfectly well that it exists.

But why cannot each member of a choral society be made a better singer?

For the last fifteen years I have had my heart set upon providing conductors of choral societies with a Manual of Exercises in Vocalisation which might be to each member a sort of genuine "singing lesson" before he should set to work on cantatas or oratorios. At last I have found time to put to paper what I have so long carried in my head. In my earlier days I was a hard-working and enthusiastic conductor of choral societies, so their needs are known to me by personal experience. I discovered the want of such a manual by having to teach one of my voluntary choirs to sing a series of vocal exercises from memory. But I noticed that when the first quarter of an hour or twenty minutes had thus been devoted to exercises in "vocalisation" the singing for the rest of the evening was infinitely superior to what it was when they had not been practised at all.

What has always struck me forcibly is, that members of choral societies are often so very—what would be now described as "casual." Is the music difficult? Then the conductor ought to teach them how to sing it! It never seems to occur to the vast majority of them that they might, by a little personal effort, so improve their musical equipment as to save the conductor a lot of tiresome fault-finding and themselves a lot of drudgery. Is there any more unpleasant operation than the reiterated "pulling up" of *those* tenors, or *those* trebles, in order to make them go a dozen times over an interval or progression which they ought to have been able to sing without hesitation? Poor composer to have his music thus knocked about! poor conductor to have to whip up the stupid! and how about the other members of the society, who have to sit patiently while the awkward squad (gradually losing its temper) is being taught a musical goose-step! Surely this method of mastering the difficulties of a "magnum opus" is very clumsy, and wasteful of

precious time. In no other branch of music is such a method tolerated. A student of an instrument, if properly taught, is taken through a technical course which embodies the chief difficulties he is likely to meet in the best classics. Let us view studies and exercises, if you please, in their right light: they are intended not so much to *lead up* to difficulties, as to take a pupil *over* them and *above* them, so that he shall descend or *let himself down* to what, under other circumstances, would prove insurmountable obstacles.

The exercises in this Primer have been constructed on this principle. They embody most of the difficulties which present themselves to ordinary singers in societies and classes, and I really believe that any conductor who will have the courage to make his choir or society master thoroughly the contents of this little work will be rewarded by finding those under his *bâton* more ready and able to give a good rendering of important works, and more interested in the works themselves, because they will not have heard every unusual or striking progression mauled and battered in the process of learning. Nor will he find it so difficult to get a good attendance at practices; the prospect of getting some tuition in the *art of singing* will make many a lukewarm member most anxious not to miss the "first twenty minutes" during which this tuition is given. Sometimes adults are frightened at the mention of exercises because they think they may be driven through a course of mere baby music; but a peep at the pages which follow will, I hope, prove that plenty of good work is cut out for those who have serious intentions of becoming useful members of a choral society.

The vocal training of the adult members of voluntary church choirs seems to be generally, if not entirely neglected. Much trouble is bestowed upon the boys, but the men have in this respect no assistance. Why this should be so it is impossible to say: the system cannot be defended.

TO CONDUCTORS.

THE remarks under the head of consecutive italics (*a, b, c, &c.*) are given as *texts* on which a conductor can preach a useful homily.

If the first twenty minutes of an ordinary weekly practice be devoted to vocalisation, one exercise might be selected from each division—*e.g.*, one on sustained breath, one on scale passages, one on arpeggio, one on chromatics, and so on.

But if a choir is specially weak in one branch, more time should of course be devoted to that study.

Also, before rehearsing a particularly chromatic composition, chromatic exercises should receive more than usual attention; if the composition has many "runs" the scale exercises would naturally demand extra study—that is to say, those exercises should be selected which have special bearing on the works under study.

These exercises are not exercises in *reading at sight*; singers should be encouraged to *learn them by heart*, so as to be able to devote undivided attention to their proper vocalisation.

It will be found very beneficial to a choral society if quartets or double quartets be organized by friends for the *private* practice of these exercises. If this is done, it would be interesting to have occasional competitions between these quartet parties. But, of course, in this case the more difficult exercises must be selected for competitive study; a few at the end of the work will be found well adapted to the purpose.

If, while practising these exercises, conductors will pay attention to "unity of attack" and the art of "blending tone" (both of which are very important characteristics of a good choir), the members will profit as much as a body as, it is hoped, they will individually. If unity of attack is to be obtained, individuals must be taught not to approach notes with a "scoop" or "slide," but to enunciate each note clearly and definitely at once. The "blending of tone," which some societies so much need, is a thing to be learnt, though not easily taught. All that can be done is to insist on this subject being borne in mind, and aimed at, by adjusting the voice so as to make it combine tunefully with those around it.

The exercises are, with one or two exceptions, set to be vocalised to *ah* or *lah*; but conductors can, of course, at their discretion, substitute from time to time *oo*, *ee*, or *ay*, with or without a preliminary consonant—*e.g.*, *koo*, *lee*, &c. Flattening of pitch must be constantly guarded against; the exercises in Chapter I. (as stated farther on) will be found useful in training a choir to maintain sounds in tune. As faults in this direction arise, not so much from a bad "ear" as from a habit of *relaxing muscular tension*, they can and ought to be corrected.

Stop the ACCOMPANIMENT as soon as possible. The first ten exercises can be sung without accompaniment, also the majority of those later on.

Singing a passage in a wrong "register of the voice" should be at once pointed out, whether it is being done by an individual or a group of singers. Similar notice should be taken when there is an unsatisfactory quality of tone.

CHORAL SOCIETY VOCALISATION.

CHAPTER I.

THE student who is paying attention to his "breathing" has, in simple words, merely to learn :—

HOW BEST TO FILL HIS LUNGS :

HOW BEST TO EMPTY THEM.

But the practical difficulty of these processes is great because :—

- (1) It is necessary to learn how to take breath rapidly and when a suitable opportunity offers itself ; also, a singer has to learn to take not only *full* inspirations, but such partial inspirations as may occasionally be pressing needed. The first step is, of course, to learn to take full inspirations.
- (2) The rate of expiration has to be completely under a singer's control. It is not *natural* to us, after filling the lungs, to release their contents very slowly ; the process has to be learnt by regular practice.

To obtain these powers exercises are now given in which the singers will be required :—

- (a) To maintain a sound at an equal level of loudness or softness.
- (b) To make a *crescendo* or *diminuendo*, or both, on one given sound.
- (c) To spread a *cres.* and *dim.* equally over several notes or a whole phrase.

Composers have to rely upon the musical knowledge of singers ; they cannot arrange a series of little rests at convenient distances for breath-taking ; the following remarks may be found useful :—

- (d) When breath has to be taken between two consecutive sounds it is self-evident that time for taking an inspiration must be robbed from the end of the first note, not from the beginning of the note which follows the inspiration. But the note should not be shortened more than necessary—*e.g.*, not so much as to give hearers the impression that there are *rests* between them.
- (e) The breath-taking should not be left too late, otherwise there will not be sufficient time for a full inspiration, or, perhaps, the singer will be heard making a noise like a high-pressure pump.
- (f) A singer should always make up his mind as to how much breath he intends to take before commencing inspiration.
- (g) As equality and pace of expiration are very dependent on the way in which the voice is being produced, great attention should be paid to quality of tone, though, of course, this is a subject better learnt by private teaching than in class-singing ; but much more can be achieved by class work in this direction than is generally supposed.

Exs. 1 to 6 may be made of the greatest utility in training choirs to maintain pitch. The smallest tendency to sink should be *at once* checked, not by going back to the commencement of the exercise, but by immediately repeating the chord in which the tendency showed itself. Conductors cannot be too strict in dealing with this common failing.

FORTE SOSTENUTO.

It might be thought that nothing could be easier than to hold a note at a sort of dead level of force (loudness or softness), but such is not the case. All conductors know that few choirs can be trusted to sing more than two or three consecutive chords with an absolute uniformity of strength: there is a constant tendency for a *forte* to relax into an *mf*, and a *piano* to increase to an *mf*.

In Ex. 1 every note must be commenced *forte* and kept so.

Scale exercises become more difficult as the pace is made faster, but exercises for *sostenuto* singing become more difficult as the pace is made slower. The first attempts at the following exercise should be:—

$\text{♩} = 60.$

When more control of the breath is obtained:—

$\text{♩} = 52.$

With a first-rate choir, at:—

$\text{♩} = 72$ (eight beats in each bar).

EXERCISE 1.

Each chord to be commenced *f*, and so held.
Four slow beats.

SOPRANO. *f* Ah

ALTO. *f* Ah

TENOR. *f* Ah

BASS. *f* Ah

PIANO. *f*

To be repeated *ff*.

To be repeated *ff*.

MEZZO FORTE SOSTENUTO.

Before practising Ex. 2 on *mf* singing, it should be explained what is meant by *mezzo forte*. It is this:—

(h) Every singer has an *ordinary* strength of voice—that is, a voice produced without any effort at making it loud, or any effort to hold back the pressure for the purpose of making it soft. It may therefore be described as the production of voice *without any effort* in either of these two directions.

(i) The perfection of *mezzo forte* is to sing as it were *unconsciously* at the ordinary strength of the voice.

The ordinary singing voice is analogous to the ordinary talking voice; it is true that some of us talk louder than others, but it is none the less true that all of us have an *ordinary* strength of voice in conversation, used without any conscious effort. The analogous point in *singing* can only be reached after a long course of training and experience. The best advice to those who want to get the right amount of force in *mf* singing is, DON'T THINK ABOUT IT.

EXERCISE 2.

Each chord to be commenced *mf*, and so held.

Four slow beats, beginning ♩ = 52.

The musical score for Exercise 2 is written for four voices and piano accompaniment. It is in 4/4 time and G major. The tempo is marked 'Four slow beats, beginning ♩ = 52'. The score is divided into two systems. The first system consists of four vocal staves and a piano accompaniment. The vocal staves are in G major and the piano accompaniment is in G major. The piano accompaniment consists of a right hand with a simple harmonic line and a left hand with a bass line. The vocal parts are simple harmonic lines. The second system is similar but with different chord progressions. The tempo is marked 'Four slow beats, beginning ♩ = 52'.

PIANO SOSTENUTO.

In singing at a uniform softness the following should be remembered :—

(j) When attending to the control of the breath attention should also be given to quality of tone.

(k) There should be no uncertainty of attack when singing softly.

This last requirement (k) is difficult to obtain, even from fairly advanced choral societies. It is not uncommon to hear the Time go *all to pieces* (as conductors sometimes say) when a soft phrase is somewhat unexpectedly introduced into a movement. But of course a subdued passage should be sung as *neatly* and *clearly* as any other, albeit at a low pressure.

As the breath will last longer in soft singing than in loud, Ex. 3 can be eventually taken slower than Exs. 1 and 2.

EXERCISE 3.

Each chord to be commenced *piano*, and so held.

Four slow beats.

The musical score for Exercise 3 is written in 4/4 time and consists of two systems. Each system includes four vocal staves and a piano accompaniment. The vocal staves are marked with a piano (*p*) dynamic and the syllable 'Ah'. The piano accompaniment is marked with a piano (*p*) dynamic and the instruction 'Four slow beats.' The key signature is one sharp (F#). The first system's vocal parts are: Soprano (G4, A4, B4, C5), Alto (F#4, G4, A4, B4), Tenor (E4, F#4, G4, A4), and Bass (D4, E4, F#4, G4). The piano accompaniment consists of a right hand with chords (F#4-A4, G4-B4, A4-C5, B4-A4) and a left hand with chords (D4-F#4, E4-G4, F#4-A4, G4-B4). The second system's vocal parts are: Soprano (A4, B4, C5, B4), Alto (G4, A4, B4, A4), Tenor (F#4, G4, A4, F#4), and Bass (E4, F#4, G4, E4). The piano accompaniment consists of a right hand with chords (G4-B4, A4-C5, B4-A4, G4-B4) and a left hand with chords (F#4-A4, G4-B4, F#4-A4, G4-B4).

CRESCENDO AND DIMINUENDO.

We now come to exercises for the gradual increase and diminution of force. It must be borne in mind that :—

- (l) All increase or diminution of force must be dependent on the length of the note or phrase over which it is extended. In other words, it must be very gradual in extended *crescendo* or *diminuendo* passages, but proportionately rapid in short passages or single notes.
- (m) The increase or decrease must be as uniform as possible. The sign itself suggests this by its up and down shape.

In listening to choral performances we all of us have heard *cres.* or *dim.* passages completely spoiled by some few evilly-disposed persons who have given a sudden jerk in the ascent thus :—

or, what is equally bad, a sudden drop in the descent thus :—

EXERCISE 4.

Very slow.

The musical score for Exercise 4 is written for four vocal parts (Soprano, Alto, Tenor, Bass) and a piano accompaniment. The key signature is one flat (B-flat major or D minor) and the time signature is 4/4. The tempo is marked 'Very slow.' The score includes crescendo and diminuendo markings (wavy lines) over the vocal parts, indicating gradual changes in volume. The piano part is marked with a piano (p) dynamic. The exercise is divided into two systems, each containing four vocal staves and a piano staff. The first system includes the vocal parts and the piano accompaniment. The second system continues the vocal parts and piano accompaniment. The score is numbered 8237 at the bottom.

8237

EXERCISE 5.

The musical score for Exercise 5 is written in B-flat major (two flats) and 4/4 time. It consists of four systems, each with four staves. The first two staves of each system are vocal parts, and the last two are piano accompaniment. The vocal parts feature a melodic line with various ornaments, including grace notes and slurs, and are accompanied by a steady harmonic line. The piano accompaniment provides a rhythmic and harmonic foundation, with chords and moving lines in both hands. The exercise is marked with a tempo of 4/4 and includes dynamic markings such as *mf* and *f*. The notation includes various musical symbols such as notes, rests, slurs, and ornaments.

We now come to passages in which the voice moves during the process of increasing or diminishing in force. In Ex. 6 the *diminuendo* should commence on the last beat of the first bar of each two notes.

It should be remembered, in addition to what has been previously stated, that:—

- (n) No *sudden* change of force should take place on moving the voice to another note. Breath to be taken between each group only—that is, during the rests.

EXERCISE 6.

The musical score for Exercise 6 is presented in two systems. Each system consists of four vocal staves (Soprano, Alto, Tenor, Bass) and a piano accompaniment. The key signature is one sharp (F#), and the time signature is 4/4. The vocal parts are written in a style that emphasizes dynamic control, with slurs and accents indicating the *diminuendo* and *diminuendo* passages. The piano accompaniment provides a harmonic foundation for the vocal lines. The first system includes the vocal line for the Soprano, with the word 'Ah' written below the first note. The second system continues the exercise with similar vocal and piano parts.

ON PREVIOUS INSTRUCTION.

The next exercise (Ex. 7) contains a combination of the various subjects of practice already given. If it is to be of any use it is necessary that the marks of force should be strictly observed in their various gradations; also, that breath should *only* be taken when marked.

Only one exercise of this kind is given, because the classical works under the study of any choral society will provide ample material of the kind.

EXERCISE 7.

ah, . . . ah, lah, . . . lah, . . . lah, . . . la, . . . la, . . . ah, . . . ah, . . .
 ah, . . . ah, lah, . . . la, . . . lah, . . . ah, . . . lah, . . . ah, . . . ah, . . . la, . . . ah, . . . ah, . . .
 ah, . . . ah, lah, . . . ah, lah - a, lah, . . . lah, . . . la, . . . la, . . . ah, . . . ah, . . .
 ah, . . . ah, lah, . . . lah, . . . lah, . . . lah, . . . ah, . . . ah, . . . ah, . . . ah, . . .

SFORZANDO.

In practising *sforzando* the important facts are:—

- (o) The force has to be suddenly (though not too suddenly) reduced after the first grip of the sound.
- (p) The first attack should be louder than the force of the passage as directed, and the close of the *sforzando* should not be softer than the force marked. [For example: in a passage marked *f* the actual attack of *sfz.* must be louder than *f*, and the end of the *sfz.* must be not less than *f*. In the following exercise (Ex. 8) the level force is marked *mf*, the *sfz.* must therefore be *f* and must close not softer than *mf*, and so on.]

A proper observance of this law (p) would prevent a common fault in choral performances—namely, the too great falling off in force when a note forming part of a *forte* passage has been marked *sfz.* It requires very great skill and delicacy to make a proper *sfz.* in a passage marked *p*. In order to secure this the following exercises (Exs. 8 and 9) should be first practised with *mf* as their force, afterwards with *piano* as their level direction of power.

EXERCISE 8.

Kah, . . . dah, . . . mah, . . . lah, . . . kah, . . . dah, . . .
 Kah, . . . dah, . . . mah, . . . lah, . . . kah, . . . dah, . . .

 mf , dim. mf
 mf , dim. mf
 mf , dim. mf
 mf , dim. mf

Repeat, with *piano* substituted for *mf* at the head.

ON PREVIOUS INSTRUCTION.

The next exercise (Ex. 10) will prove whether previous exercises have had their proper effect on the singers. Attention should be called to the following fact:—

- (q) The act of taking breath, so far as it disturbs the *sostenuto* or *legato* of a passage, becomes an important factor in *phrasing*, or the art of properly and artistically grouping consecutive notes into a musical sentence, or into the parts that make it up. Of course, the more elaborate the sentence of music, the more numerous will be the sub-divisions requiring a clear outline.
- (r) In choral singing it often or even generally happens that the vocal parts cannot take breath, group notes, or *phrase* simultaneously; in such cases the singer must not allow himself or herself to be disturbed by neighbours.

In the following exercise attention should specially be paid to the phrasing. It should also be sung with expression.

EXERCISE 10.

p *pp* *cres.* *mf* *dim.*
 . . . lah, . . . lah, . . . lah, lah, lah, lah, lah, . . .

CHAPTER II.

ELASTICITY OF VOICE.

OUR next study after learning how to control the breath must be to obtain elasticity of vocalisation. The want of this elasticity is too often observable in choral performances when rapid scale passages, or scale passages mixed with intervals, have to be sung. The following should be remembered :—

- (a) Elasticity of vocalisation depends upon facility of muscular action ; it is therefore absolutely necessary to begin practice slowly. No man who wishes to learn how to run a mile would be such an idiot as to start off for the first attempt at a "record" pace ; but, unfortunately, a vast number of young singers do permanently injure their vocalisation by beginning to practise scale passages and runs too fast.
- (b) The points to be aimed at are, perfect clearness and distinctness of each note, coupled with regularity and smoothness—that is to say, a running passage should not be "smeared," nor should it, on the other hand, consist of a series of little "bumps."

The exercises which follow give consecutive series of three notes and four notes, without and with an interval.

When time permits, each of the four classes of voices (S.A.T.B.) should be heard separately, and afterwards in twos (S. & T., A. & B.) in octaves. The following remarks may be useful :—

- (c) The non-accented notes are those which are generally maltreated (*e.g.*, the second and fourth of a group of four, or the middle note of three.) Notes falling on accents generally take care of themselves.
- (d) The movement of the voice to or from a semitone is more difficult than to or from a whole tone. Hence, semitones are less often rendered neatly and clearly than tones.

In order to give voices some interval of rest it is advisable that altos and basses should sing alternately with trebles and tenors (see the numbering of the short exercises grouped under Ex. 11).

At first, the breath may be taken after every four groups of notes (see breath marks) ; but when greater facility is reached the breath should only be taken once in each line, at the end of the second bar. It will prove an excellent practice to make choirs sing such exercises first *forte* then *piano*.

EXERCISE 11.

TREBLES AND TENORS IN OCTAVES, *forte* then *piano*. ♩ = 60, advancing to ♩ = 84 according to efficiency.

8 Ah

EXERCISE 12.

$\text{♩} = 72$, advancing to $\text{♩} = 84$ according to efficiency.

The musical score for Exercise 12 is organized into three systems, each consisting of four staves. The first system includes vocal parts (three staves) and piano accompaniment (two staves). The vocal parts are marked with 'Ah' and feature a melodic line with eighth-note patterns. The piano accompaniment provides a harmonic foundation with chords and moving lines. The second and third systems follow a similar structure, with the vocal parts continuing the melodic development and the piano accompaniment supporting the overall texture. The score is written in a key with one flat (B-flat) and a 4/4 time signature. The tempo is indicated as 72 beats per minute, with a note to advance to 84 beats per minute as efficiency improves.

ARPEGGI.

The singing of "broken chords" or *arpeggi* has always been considered a test of good vocalisation. It is understood generally that :—

- (e) Unless there are special directions to the contrary, they should be sung *legato*; the voice must not be *dragged* from one note to the other so as to *blur* the effect, but yet there should be no recognisable *break* or *separation* between the notes. This happy medium constitutes the true *legato* style—one of the most difficult accomplishments of the vocalist.
- (f) The middle note of the group of three requires most attention.
- (g) It is a serious fault to divide the beat unequally, yet nothing is more common than to hear

Some of the best choral societies do not escape this blemish, especially when singing a movement in $\frac{6}{8}$, $\frac{9}{8}$, or $\frac{12}{8}$ time. Great care must be taken that the three notes are absolutely equal in length.

EXERCISE 13.

TREBLES AND TENORS IN OCTAVES, *forte* then *piano*. ♩ = 72, advancing to ♩ = 92.

ff *mf*

MIXED SCALE AND CHORD PASSAGES.

The next exercise will contain a mixture of scale-steps and intervals. It may be sung also in the key of D. Whilst cultivating individual vocalisation the member of a choral class or society must not forget that he is taking part in concerted music. Hence:—

- (h) In addition to neat and clear singing of runs, a great deal of importance must be attached to *great precision of time*; a badly trained or untrained singer frequently seems to think a run a favourable opportunity of running away. This is bad enough in *solo* singing, but in concerted music it will inevitably lead a class or society into a catastrophe.

EXERCISE 15.

First time *f*, next *p*, next *ff*. ♩ = 80, advancing to ♩ = 100.

lah, lah, lah, lah.

lah, . . . ah, lah, ah, lah.

lah, lah, lah, lah.

lah, . . . lah, . . . To be repeated 3 times. lah. End.

ON PREVIOUS INSTRUCTION.

The next exercise (Ex. 16) is of the same character as the last, but more difficult. The marks for taking breath are placed where there is a skip of a third. In ordinary music the only available place for "inspiring" is often at a skip of this kind, it will therefore be good practice to master it.

- (i) In taking breath at a skip in a long run, it is very important that the time and "swing" should not be disturbed; also, great *smoothness* should be aimed at.

EXERCISE 16.

♩ = 80, advancing to ♩ = 100.

Ah

Ah

A musical score for piano and voice, page 20. The score is written for a piano and a voice part. The piano part is written in treble and bass clefs, and the voice part is written in a single staff. The score is divided into three systems. The first system has two staves for the piano and one for the voice. The second system has two staves for the piano and one for the voice. The third system has two staves for the piano and one for the voice. The piano part features a complex, flowing melody with many sixteenth and thirty-second notes. The voice part has a few notes, including a vocalization "Ah" in the first system. The score is written in a standard musical notation style with various ornaments and slurs.

Ah

Ah

SCALES.

The scale exercises (Ex. 17) should be commenced at a very moderate, almost a slow pace, say,

$$\text{♩} = 56.$$

This should be gradually increased until sufficient facility is attained to allow it to be sung at

$$\text{♩} = 88.$$

EXERCISE 17.

TREBLES AND TENORS IN OCTAVES.

Exercise 17, titled 'TREBLES AND TENORS IN OCTAVES'. The score is in 4/4 time and consists of two systems. Each system has a vocal line (treble clef) and a piano accompaniment (grand staff). The vocal line features a series of eighth notes, with a 'Ah' marking under the first measure. The piano accompaniment provides harmonic support with chords and moving lines. The key signature changes from one sharp (F#) to two flats (Bb, Eb) across the systems.

This sequence may be continued two steps farther, continuing from last note of voice part.

ALTOS AND BASSES IN OCTAVES.

DIATONIC SCALE PROGRESSIONS.

It should be noticed that there are two classes of exercises in scale-singing—namely, those in which the scale is chromatically raised step by step, and those in which the passages lie in one key. The former class (*see* Ex. 17) is, of the two, much the easier to sing, because in them the tones and semitones always occur in the same relative position—namely, between 3 and 4 and 7 and 8. But in the latter their position is relatively constantly changing, *e.g.* :—

- (j) In choral singing nearly all mistakes and blundering arise from the fact that the singers have not recognised the actual position of the semitones. Before singing such passages they should be asked to name aloud the position of the semitones in each.

If time permits the following exercise (Ex. 18) should be sung, beginning *piano*, gradually increasing the force to *forte* at bar 9, then making a *diminuendo* to the close.

EXERCISE 18.

TREBLES AND TENORS IN OCTAVES.

SCALE PASSAGES IN ONE BREATH.

In the next exercise (Ex. 19) the whole of the phrase must be sung in one breath, *e.g.* :—

and so on in all similar passages. A good slur should be made at each skip of an octave :—

as the control of the breath is put to a severe test by having to take this interval at the close of an expiration.

This exercise should at first be taken not faster than

$\text{♩} = 60.$

If there are a good many weaklings in a choir it might even be taken slower. The pace may at successive trials gradually be increased until it might be sung by a first-rate choir at

$\text{♩} = 92.$

EXERCISE 19.

First system of musical notation for Exercise 19. It consists of five staves. The top four staves are vocal parts in 4/4 time, marked *mf*. The first staff has a vocal line with the syllable "Ah" and a melodic line with eighth-note patterns. The second staff has a vocal line with the syllable "Ah" and a melodic line with eighth-note patterns. The third staff has a vocal line with the syllable "Ah," and a melodic line with eighth-note patterns. The fourth staff has a vocal line with the syllable "ah," and a melodic line with eighth-note patterns. The fifth staff is a piano accompaniment in 4/4 time, marked *mf*, with a bass line and a treble line. The piano part features a steady eighth-note pattern in the bass and a melodic line in the treble.

Second system of musical notation for Exercise 19. It consists of five staves. The top four staves are vocal parts in 4/4 time, marked *cres.* and *f*. The first staff has a vocal line with the syllable "Ah" and a melodic line with eighth-note patterns. The second staff has a vocal line with the syllable "Ah" and a melodic line with eighth-note patterns. The third staff has a vocal line with the syllable "Ah" and a melodic line with eighth-note patterns. The fourth staff has a vocal line with the syllable "Ah" and a melodic line with eighth-note patterns. The fifth staff is a piano accompaniment in 4/4 time, marked *cres.* and *f*, with a bass line and a treble line. The piano part features a steady eighth-note pattern in the bass and a melodic line in the treble.

This musical score is for a piano and orchestra. It consists of two systems, each with five staves. The first four staves of each system are for the orchestra, and the fifth is for the piano. The piano part is written in a grand staff (treble and bass clef). The orchestral parts are in various staves, including treble and bass clefs. The score features dynamic markings such as *ff* (fortissimo) and *f* (forte), and articulation marks like accents (>) and slurs. The music is in a key with one flat (B-flat major or D minor) and a 2/4 time signature. The first system shows a complex orchestral texture with rapid passages in the woodwinds and strings, while the piano part provides a harmonic foundation with chords and moving lines. The second system continues this texture, with the piano part becoming more active in the lower register.

The first system of the musical score consists of five staves. The top four staves are vocal parts, and the bottom staff is the piano accompaniment. Measures 1-4 are shown. The vocal parts begin with a rest in measure 1, followed by a melodic line in measure 2. The piano accompaniment provides a harmonic foundation with chords and moving lines. Dynamics include *dim.* (diminuendo) and *p* (piano).

The second system of the musical score consists of five staves, continuing from the first system. Measures 5-8 are shown. The vocal parts feature a more active melodic line, often marked with *ff* (fortissimo). The piano accompaniment continues with chords and moving lines, marked with *ff* and *rall.* (rallentando). The system concludes with a double bar line and repeat dots.

EQUALITY OF NOTES FORMING GROUPS.

The object of Ex. 20 is to cultivate that perfect equality in the length of three-note groups which has already been spoken of. It should be for a long time sung quite slowly, say,

$\text{♩} = 76 \text{ or } 80.$

A highly trained choir ought to be able to sing it (without the least suggestion of "scamper") at

$\text{♩} = 120.$

Also, well-trained singers should be able when the exercise is taken "up to pace" to sing two bars in a breath, commencing at bar 9.

EXERCISE 20.

The musical score for Exercise 20 consists of five systems of staves. Each system contains a treble staff and a bass staff, with a grand staff (treble and bass clef) in the middle. The key signature is two flats (B-flat and E-flat), and the time signature is 12/8. The score includes various musical notations, including notes, rests, slurs, and dynamic markings such as *mf* (mezzo-forte). The exercise is designed to cultivate perfect equality in the length of three-note groups.

This musical score is for a piano and orchestra. It consists of 12 staves. The first six staves are for the piano, and the last six are for the orchestra. The piano part is written in treble and bass clefs, while the orchestra part is written in treble, alto, and bass clefs. The score is in 2/4 time and features a variety of musical notations, including eighth notes, sixteenth notes, and chords. Dynamics such as *f* (forte) and *fff* (fortissimo) are indicated. The piece concludes with a *fff rall.* (fortissimo, rallentando) marking.

8237

CHAPTER III.

CHROMATIC SCALE.

CHROMATIC passages must be carefully examined before being sung, because there is often found in them a mixture of diatonic and chromatic scale steps.

Pure semitonal movement does not, as a rule, give much trouble unless it is rapid in pace.

- (a) In the case of those whose musical "ear" is not of the highest order, it will be found that there is a tendency to expand the interval of a semitone so that the voice gets *too high* in ascending a chromatic octave, and *too low* in making its descent. Sometimes they flatten in both directions.
- (b) Nothing is more annoying than to hear singers commencing a chromatic note out of tune, and then hear them *making it right*. In order to avoid this fault (which rapidly becomes a *habit* with indifferent singers in choral music), it will be found useful to practise the chromatic scale with a *sforzando* on each note; this will, if persevered in, successfully put a stop to the process of bungling, groping, and tuning, which takes place when half-trained choirs attempt chromatic progressions.

Every individual in a good choral society ought to be able to sing a chromatic octave at a moderate pace (say, each note = 120), up and down, with perfect accuracy, provided that the octave lies well within the compass of his or her voice.

EXERCISE 21.

ALL VOICES IN UNISON.

Then it should be sung *without* accompaniment, after the first chord only; the final chord to be played in order to test the maintenance of pitch. Then at different pitches, e.g.:—

(a) ALL VOICES. (b) ALL VOICES. (c) ALL VOICES. (d) TREBLES AND TENORS. (e) ALTOS AND BASSES.

Keys Eb, Eb, F, F#, G. Keys G, A, Bb, B.

MIXED DIATONIC AND CHROMATIC PROGRESSIONS.

In order to better illustrate the difficulty of seeing and realizing the difference between diatonic and chromatic scale-steps, two exercises are now given, one of which is purely diatonic and contains no accidentals; the other has the same progressions treated chromatically.

(c) It will be advisable to explain this to the choir by playing or singing extracts from each and comparing their difference, *e.g.* :—

becomes

becomes

becomes

and so on. If, after a careful exposition of the nature of the two exercises, any members of the choir cannot sing both correctly—well, such persons ought to be amiably suppressed “for good and all.” The first study of these exercises should be quite slow, say at a *tempo* of

$\text{♩} = 60.$

Eventually, when in the hands of a fine choir,

$\text{♩} = 80,$

or even a little faster.

EXERCISE 22.

DIATONIC.

This musical score is for a piano and voice piece, page 32. It features a piano accompaniment and a vocal line. The piano part consists of a right-hand melody with eighth-note patterns and a left-hand accompaniment with chords and eighth-note figures. The vocal line is in the soprano register, with lyrics "Ah" appearing twice. The score is marked with dynamic indications: *mf* (mezzo-forte) and *f* (forte). The tempo is indicated by a common time signature (C). The key signature has one flat (B-flat). The score is written on ten staves, with the piano part occupying the bottom eight staves and the vocal part on the top two staves. The piano part is divided into two systems of four staves each. The vocal part is on two staves. The piano part features a variety of musical notations, including eighth notes, sixteenth notes, and chords. The vocal part features a melodic line with lyrics. The score is marked with dynamic indications: *mf* (mezzo-forte) and *f* (forte). The tempo is indicated by a common time signature (C). The key signature has one flat (B-flat). The score is written on ten staves, with the piano part occupying the bottom eight staves and the vocal part on the top two staves. The piano part is divided into two systems of four staves each. The vocal part is on two staves. The piano part features a variety of musical notations, including eighth notes, sixteenth notes, and chords. The vocal part features a melodic line with lyrics.

mf
Ah

f *ff*

f *ff*

This musical score page contains measures 33 through 40. It features a piano part with a grand staff (treble and bass clefs) and a string quartet part with four staves (two treble and two bass clefs). The piano part begins with a forte (*f*) dynamic and a series of sixteenth-note runs. The string quartet part provides harmonic support with sustained chords and moving lines. Measures 35 and 36 include a *dim.* (diminuendo) marking. Measures 37 and 38 feature a piano (*p*) dynamic. The score concludes with measure 40, which also has a piano (*p*) dynamic. The notation includes various musical symbols such as beams, slurs, and dynamic markings.

34

pp *ff* *pp* *ff* *pp* *ff* *pp* *ff*

EXERCISE 23.

CHROMATIC.

mf *Ah* *mf* *Ah* *mf* *Ah* *mf* *Ah*

The first system of musical notation consists of five staves. The top staff is a treble clef with a key signature of one flat (B-flat) and a 2/4 time signature. It contains a melodic line with eighth and sixteenth notes, often beamed together. The second staff is a treble clef and is empty. The third staff is a treble clef with the same melodic line as the first. The fourth staff is a bass clef and is empty. The fifth staff is a grand staff (treble and bass clefs) with a bass line consisting of eighth and sixteenth notes.

The second system of musical notation consists of five staves, similar to the first. The top staff has a melodic line. The second staff is empty. The third staff has a melodic line. The fourth staff is empty. The fifth staff is a grand staff with a bass line.

The third system of musical notation consists of five staves. The top staff has a melodic line with a forte (*f*) dynamic marking. The second staff is empty. The third staff has a melodic line with a forte (*f*) dynamic marking. The fourth staff is empty. The fifth staff is a grand staff with a bass line and a forte (*f*) dynamic marking.

Musical score for piano, measures 36-45. The score is written for a grand piano (treble and bass clefs) and four single staves. The key signature is one sharp (F#). The tempo is marked with a quarter note. The score features complex rhythmic patterns, including sixteenth and thirty-second notes, and dynamic markings such as *dim.* (diminuendo), *p* (piano), *pp* (pianissimo), and *ff* (fortissimo). The first system (measures 36-39) includes *dim.* markings. The second system (measures 40-43) includes *p* markings. The third system (measures 44-45) includes *pp* and *ff* markings. The score concludes with a double bar line and a repeat sign.

Chromatic sequences of harmony are, as a rule, a terrible stumbling-block to the ordinary choral society. Examples need not be named—they are familiar to all experienced conductors. In such cases the difficulty lies not only in the chromatic progression itself, but in the fact that the *accompanying harmonies* must be perfectly in tune.

(d) It is the old, old story: chorus singers will rarely take the trouble to find out and take note of those steps in a progression which are *tones* and those which are *semitones*. Proper vocalisation is impossible if a singer is at all uncertain as to what notes he has to sing.

(e) It must be taken for granted that a conductor has to tell his singers a great many things which they ought (if they would only use their wits) to find out for themselves. Therefore he must analyse and explain the nature of all difficulties they encounter when studying works.

The Treble part of the exercise which follows (Ex. 24) consists entirely of *semitones*.

The Alto part (except in final bar) consists entirely of *whole tones*.

The Tenor part (except in the final bar) consists entirely of *whole tones*.

The Bass part (except in the final bar) consists of a minor third down followed by a perfect fourth up.

Each vocal part should be sung separately (with the accompaniment) before the whole is attempted. A convenient *tempo* will probably be

$$\text{♩} = 80.$$

It should be sung without accompaniment when learnt.

EXERCISE 24.

The musical score for Exercise 24 is written for four vocal parts (Treble, Alto, Tenor, Bass) and piano accompaniment. The key signature has one flat (B-flat), and the time signature is 4/4. The score consists of 16 measures. Each vocal part has a 'same sound.' box above the 8th measure. The lyrics 'Lah, lah, lah' are repeated under each note.

Treble Part: The melody consists of a series of semitones: C4, C#4, D4, D#4, E4, E#4, F4, F#4, G4, G#4, A4, A#4, B4, B#4, C5, C#5, D5, D#5, E5, E#5, F5, F#5, G5, G#5, A5, A#5, B5, C6, C#6, D6, D#6, PROGRESSIONS OF CHROMATIC HARMONY.

The exercise which follows (Ex. 25) should be explained thus:—

Up to the mark *dim.*—

The Treble part consists of *whole tones* followed by *semitones*.

The Alto part consists entirely of *whole tones*.

The Tenor part consists entirely of *whole tones*.

The Bass part consists of *semitones* followed by *whole tones*.

Each vocal part should be tried separately (with the accompaniment) before the whole is attempted.

Tempo about ♩ = 80.

EXERCISE 25.

mf *cres.*

The image shows a musical score for the song "The Rose Tree." It consists of five systems of music. The first four systems are for vocal parts, each with a treble and bass staff. The fifth system is for the piano accompaniment, also with a treble and bass staff. The key signature is one flat (B-flat), and the time signature is 2/2. The vocal parts have lyrics: "lah, . . . lah, . . . lah, . . . lah, . . . lah." The piano part has a melody in the right hand and a bass line in the left hand. The score includes dynamic markings: *f* (forte), *dim.* (diminuendo), and *p* (piano). The phrase "To be repeated 3 times." is written above the final measure of the vocal parts and the piano part.

MIXED DIATONIC AND CHROMATIC STEPS.

As a specimen of the manner in which composers mix diatonic and chromatic progressions, and as a warning that attention must be paid to the fact, the choir should be asked to sing the following exercise :—

EXERCISE 26.

All voices in unison or octaves ♩ = 60.

TREBLES AND ALTOS.
mf

Ah, ah, ah, ah, ah, ah, ah, ah, ah, ah, ah, ah, ah, ah, ah, ah. . .

TENORS AND BASSES.
mf

mf

[If sung by all quite correctly at first sight, the conductor must be congratulated on the excellence of the material under his direction.]

The chromatic scale when used melodically in small portions shows irregularities which ought to be well noted—*e.g.*, between the first, fourth, and fifth degrees and the major third above them there are *four* steps (see Ex. 27), but between the second, third, sixth, and seventh degrees to the diatonic third above them there are only *three* steps (see Ex. 28).

EXERCISE 27.

[illegible]

EXERCISE 28.

[illegible]

MIXED EXERCISES.

All the noticeable and treacherous progressions just mentioned as incident to the common use of portions of the chromatic scale will be found embodied in the next exercise (Ex. 29), and a careful mastery of it will prove of great use to choral classes. But in addition there will be found some marks of *staccato*.

(f) Though comparatively rarely required in choral performances, the practice of *staccato* will be found most useful in giving control over the voice. It requires some experience to hit the sounds perfectly in tune, but the power of doing so greatly assists singers in making a firm *attack* in "leads" or other prominent passages.

EXERCISE 29.

At first, ♩ = 8. As the choir gains proficiency up to ♩ = 120.

The musical score for Exercise 29 is written for four voices (Soprano, Alto, Tenor, Bass) and piano accompaniment. It is in 2/4 time. The first system begins with a tempo instruction: "At first, ♩ = 8. As the choir gains proficiency up to ♩ = 120." The lyrics for the first system are: "Lah, lah, lah, lah, lah, lah, . . . lah, lah, lah, lah, lah, lah, . . . lah, lah, lah, lah, lah, lah, . . .". The second system of the score has lyrics: "lah, lah, . . . lah, lah, . . . lah, . . . lah, lah, lah, lah, lah, lah, lah, lah, lah, lah, lah, lah, . . .". The piano accompaniment consists of two staves (treble and bass clef). Dynamics include *mf* (mezzo-forte), *cres.* (crescendo), *dim.* (diminuendo), and *p.* (piano). The score is marked with various musical notations such as slurs, accents, and dynamic markings.

The musical score consists of five systems of staves. The first four systems each have three staves (treble, vocal, and bass), while the fifth system has two staves (treble and bass). The music is written in G major (one sharp) and 4/4 time. It features various musical notations such as accents (>), dynamic markings (f, dim.), and slurs. The lyrics are repeated throughout the piece, with some variations in phrasing. The overall style is characteristic of early 20th-century popular music notation.

ah, lah, lah.

ah, lah, lah.

ah, lah, lah.

ah, lah, lah.

CHAPTER IV.

DIFFICULT INTERVALS.

AUGMENTED and diminished intervals are rarely sung perfectly correctly in choral performances. This is entirely owing to the fact that they are not frequently met with in voice parts, and singers are unfamiliar with them.

- (g) It is not easy to discover why some people hope to be able to *sing* a difficult progression correctly *without practice*, whilst they know perfectly well that instrumentalists go on playing the same passage over and over again, hundreds of times, to achieve a successful result.
- (h) When a choir is once perfectly familiar with such progressions the conductor will find his task of teaching important works considerably lightened.
- (i) In singing augmented or diminished intervals no "groping and tuning" can be tolerated. There should be no compromise by getting "somewhere in the neighbourhood" of the right sound.

Exs. 30, 31, 32 should be commenced at a slow *tempo*, say

$$\text{♩} = 88;$$

when proficiency is reached it may be sung

$$\text{♩} = 100;$$

or even faster—

$$\text{♩} = 120.$$

Breath to be taken according to phrasing when required.

EXERCISE 30.

TREBLES AND TENORS (separately, then together).

mf

musical score for page 47, featuring vocal and piano parts. The score is written in B-flat major (two flats) and 4/4 time. The vocal parts (Soprano and Alto) and the piano accompaniment (Right and Left Hands) are shown. The lyrics "Ah" are written under the vocal lines. Dynamic markings include *mf* (mezzo-forte), *dim.* (diminuendo), *p* (piano), and *cres.* (crescendo).

The score is organized into two systems. The first system contains four staves: Soprano, Alto, Tenor, and Piano. The second system contains four staves: Soprano, Alto, Tenor, and Piano. The vocal parts are written in treble clef, and the piano parts are written in treble and bass clef.

Key markings and lyrics include:

- mf* (mezzo-forte)
- dim.* (diminuendo)
- p* (piano)
- cres.* (crescendo)
- Lyrics: "Ah"

This musical score is for a voice and piano piece, page 48. It features five systems of staves. The first four systems each consist of a vocal line (treble clef) and a piano accompaniment line (bass clef). The vocal line includes lyrics "Ah" under the first two systems. The piano accompaniment is written in a lower register. The fifth system consists of a single grand staff (treble and bass clefs). The music is in a key with three flats (B-flat, E-flat, A-flat) and a 3/4 time signature. Dynamics include *p* (piano), *mf* (mezzo-forte), *cres.* (crescendo), *dim.* (diminuendo), *pp* (pianissimo), and *rall.* (rallentando). The score concludes with a double bar line.

EXERCISE 36.

The exercises which follow are for general practice. When breath-marks are not given, singers can discover where to take breath by following the phrasing.

[illegible]

ah, . . . ah, . . . ah, . . . ah, . . .

mf Ah, . . . ah, . . . ah, . . .

mf Ah, . . . ah, . . . ah, . . . ah, . . .

ah, lah, lah, . . . lah, . . . lah, . . . lah, . . . ah, . . .

ah, . . . ah, . . . lah, . . . ah, . . . lah, . . . ah, . . . lah, . . . ah, . . .

ah, . . . ah, . . . ah, . . . ah, . . . ah, . . .

ah . . . lah, lah, ah, . . .

ah, . . . ah, . . . ah, . . . ah, . . . ah, . . .

ah, . . . ah, . . . ah, lah, lah, lah, ah, . . . ah, . . . ah, . . .

ah,

ah, . . . ah, . . . ah, . . . ah, . . . ah, . . . ah, . . .

The first system consists of six staves. The top four staves are vocal parts with lyrics. The fifth and sixth staves are piano accompaniment. The key signature has one flat (B-flat), and the time signature is 4/4. The music features a mix of quarter, eighth, and sixteenth notes, with some slurs and ties.

. . . lah, . . . ah, . . . ah, . . . ah, . . . ah, . . . ah, . . .

. . . ah, . . . ah, . . . ah, . . . ah, . . . ah, . . . ah, . . .

. . . ah, . . . ah, . . . ah, . . . ah, . . . ah, . . .

. . . lah, lah, lah, ah, . . . ah, . . . ah, . . . ah, . . . ah, . . .

The second system continues the musical piece with six staves. It follows the same instrumental and vocal structure as the first system. The lyrics continue with variations of 'ah' and 'lah'. The piano accompaniment provides a steady harmonic and rhythmic foundation.

Exercise 36 consists of four vocal staves and a piano accompaniment. Each vocal staff begins with the syllable "ah." and contains a series of eighth and sixteenth notes, some with accents. The piano accompaniment is in the lower register, featuring chords and moving lines. The key signature has one flat, and the time signature is 3/4.

EXERCISE 37.

Exercise 37 consists of four vocal staves and a piano accompaniment. The tempo is marked "Slow." with a metronome marking of 60. The key signature has one sharp (F#), and the time signature is 4/4. The vocal parts feature the syllables "Ah," and "ah," with various dynamics including *f*, *mf*, and *dim.* The piano accompaniment is marked "Unaccompanied." and includes dynamics *f* and *mf*.

First system of musical notation, measures 1-8. The score is in G major (one sharp) and 4/4 time. It features four vocal staves and a piano accompaniment. The vocal parts have lyrics "ah," and dynamic markings *f*, *p*, and *pp* are present. The piano accompaniment includes a grand staff with a *f* dynamic marking.

Second system of musical notation, measures 9-16. The score continues in G major and 4/4 time. It features four vocal staves and a piano accompaniment. The vocal parts have lyrics "Ah," and dynamic markings *p* and *pp* are present. The piano accompaniment includes a grand staff with a *p* dynamic marking.

Musical score for page 55, measures 1-16. The score includes four vocal staves and a piano accompaniment. The vocal parts have lyrics "ah" and dynamic markings "cres." and "dim.". The piano part has a complex rhythmic pattern.

Musical score for page 55, measures 17-32. The score continues the vocal and piano parts from the previous system. The vocal parts have lyrics "Ah" and "ah" and dynamic markings "p" and "cres.". The piano part continues with a complex rhythmic pattern.

First system of musical notation. It includes four vocal staves (Soprano, Alto, Tenor, Bass) and a piano accompaniment. The vocal lines feature the syllable "ah" with various melodic lines. Dynamics include *dim.* (diminuendo) and *p* (piano). The piano accompaniment consists of arpeggiated chords in the right hand and a steady bass line in the left hand.

Second system of musical notation, continuing the piece. It features the same four vocal staves and piano accompaniment. The vocal lines continue with "ah" syllables. Dynamics include *f* (forte), *dim.*, and *f>>>* (very forte). The piano accompaniment maintains its arpeggiated texture.

THIRD EDITION.

REDUCED PRICE, SEVEN SHILLINGS AND SIXPENCE.

A DICTIONARY
OF
MUSICAL TERMS

EDITED BY

SIR J. STAINER, M.A., MUS. DOC.,
MAGDALEN COLLEGE, OXFORD,

AND

W. A. BARRETT, MUS. BAC.,
ST. MARY'S HALL, OXFORD.

PREFACE.

THE call for a third edition of the DICTIONARY OF MUSICAL TERMS has given the Editors an opportunity of correcting several little inaccuracies which had crept into the earlier issues. They cannot but feel gratified at the manner in which it has been received by musicians and the public generally, and they venture to hope that students will always find it a useful storehouse of facts associated with the art, science, and archæology of music.

DAILY TELEGRAPH.

Even as the work stood before, it met with favour as by a long way the most valuable of its kind available to the English reader. The definitions are clear, and the articles confine themselves to statements of facts, waste no words, and go straight to the mark. Musical amateurs as well as students should have this book by them; it is capable of telling them what they want to know.

MORNING POST.

The Editors may be heartily congratulated upon the success of their labours, and upon the popularity of their work. Notwithstanding the appearance of other books of like character, the Dictionary holds its own for usefulness and value. There is no attempt to conceal the want of knowledge under the mass of verbiage. The subjects are treated in a terse, straightforward, plain, and accurate manner, with a manliness of style which at once convinces the reader of the capacities of the writers. There is, however, a grace and elegance in the English, relieved where possible by touches of humour which makes the Dictionary fascinating reading, apart from its authoritative statements.

THE WORLD.

The same great qualities must be acknowledged in a work that ranks very high indeed, a work called "A Dictionary of Musical Terms," edited by Dr. Stainer and Barrett, M.B., with a knowledge, a patience, a completeness which render it a valuable book of reference. . . . This book contains so many interesting paragraphs, that I was arrested against my will and prevented from flying through the pages as usual. One quality beside the extreme clearness of the type is the nearly total absence of printing faults.
